English (Native or bilingual Proficiency)

Lithuanian (Native or bilingual Proficiency)

Spanish (B1-B2)

## WORK EXPERIENCE

January 2024 - May 2026

Vilnius, Lithuania

### Mediatech

#### SEO Specialist

- Working with various locales (such as DE, ES, IT, JA, NL, etc.) and projects. Monitoring domains and their performance (including via tools like Power BI or Looker), ensuring website health, performing audits, taking care of internal linking, homepages, redirects and category structures, and other technical aspects.
- Working closely with the content team to ensure large volumes of new and refactored content pieces are prepared within required timeframes, performing QA checks and publishing said pieces according to predetermined plans. Helping the content team regarding AI use, presenting useful tips and insights.
- Developing long-term organic growth strategies, researching trends, making predictions based on past performance or upcoming events and opportunities, performing tests, and modifying Q plans accordingly. Performing not only keyword research but also making data-driven predictions beyond what the keyword data offers. Implementing modern SEO practices to capitalize on and take advantage of trends.
- Coming up and executing strategies and tools to optimize and automate workflows, SERP scraping and analysis, and content production (e.g., writing Python scripts and making use of APIs for both scraping and generating content that fits our needs). Providing such tools to the content team when needed, assisting and guiding them with installation and maintenance.
- Working with AI Overviews. Analyzing the potential benefits and downfalls of ranking in them, applying and testing new practices to achieve results.
- Working with custom schemas (e.g., LiveBlogPosting Schema). Developing and applying them manually and collaborating with dev teams to make them into permanent and easy-to-use options in CMS environments.
- Working closely with dev teams to implement CMS elements and ideas that provide more opportunities or streamline processes.

April 2022 - December 2023

Vilnius, Lithuania

### UAB Skrivanek

#### Assistant Project Manager

- Project Management. Management of translation and other projects involving language services and localization (including the management of one of the company's largest and most complex long-term localization projects).
- Vendor Management and Recruitment. Responsible for recruiting, selecting, managing new translators, proofreaders, copywriters, and other freelance service providers. Providing them with basic training, as well as preparing, organizing, and managing their documentation according to ISO standards.
- Keyword localization and keyword research for different locales.
- In-house Checks. Assisting the Senior Project Manager by providing final checks for translations, editing English texts, performing DTP-related tasks, and taking over the majority of their responsibilities when need be.
- Preparing vendor documentation for international tenders and internal/external audits.
- Transcreation and Copywriting. Creating monthly newsletters for vendors.
- Training new-coming interns and Junior Project Managers.

September 2020 - March 2024

#### Freelance Translator and Proofreader

- Working as a freelance LT-EN, ES-EN translator and EN proofreader.

October 2022 - Present

### Vilnius Social Club

#### Volunteer Translator

- Translating newsletters and anual reports to English.

## SKILLS

- Python, SQL, HTML, CSS
- Use of a variety of tools (Docker, Jupyter Labs, Quatro, Visual Studio Code)
- Implementation of APIs and a variety of AI tools
- Screaming Frog, Ahrefs, Semrush, keywordtool, GSC and a variety of other tools needed for SEO analytics and site health and analytics. (Power BI, Looker Studio)
- Working with custom and WP CMS environments
- Big on AI use and leaning towards AI engineering and AI implementation where possible, to improve efficiency.
- Love finding gaps and coding up tools that fill them (and with my own personal twist)
