PROFESSIONAL SUMMARY

Software- and AI-focused technical professional with hands-on experience in Python development, frontend development, API integration, workflow automation, web scraping, data analysis, and AI-assisted systems. With a background in technical SEO and analytics, I'm skilled at identifying operational gaps and turning them into practical tools, workflows, and software solutions through technical problem-solving and cross-functional collaboration.

TECH STACK

Programming: Python, SQL, JavaScript, HTML/CSS, FastAPI, REST APIs, Requests, JSON

Scraping & Automation: BeautifulSoup, Selenium, SERP scraping, parsing, workflow automation

Tools: Git, GitHub, Docker, JupyterLab, VS Code, Render, CMS environments, structured data/schema markup

AI Engineering: LLM integration, prompt engineering, structured outputs, AI workflow development, AI-assisted automation

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Looker Studio, data cleaning, EDA, statistical inference, confidence intervals

PROFESSIONAL EXPERIENCE

Mediatech

SEO Specialist

Jan 2024 - May 2026

Vilnius, Lithuania

- Developed Python scripts and API-driven tools to automate SERP scraping, research, analysis, content workflows, and repetitive operational tasks.
- Designed and implemented AI-assisted workflows for research, content generation, analysis, and internal process improvement; supported teammates with practical AI adoption.
- Built and maintained web-scraping and data-processing workflows and supported setup, usage, maintenance, and troubleshooting.
- Managed technical SEO and performance across multiple international markets, using Power BI, Looker Studio, SEO platforms, and internal data to monitor performance and identify opportunities.
- Developed data-driven SEO strategies using historical performance, trend analysis, experimentation, keyword data, and emerging search technologies including AI Overviews.
- Collaborated closely with development teams on CMS functionality, structured data/custom schema, technical improvements, and workflow-enhancing features.

UAB Skrivanek

Assistant Project Manager

Apr 2022 - Dec 2023

Vilnius, Lithuania

- Managed complex multilingual localization projects, including gaming content translation and other high-volume language workflows.
- Coordinated freelance linguists and handled QA, keyword localization, ISO documentation, audits/tenders, and junior team training.

Freelance

Translator & Proofreader

Sep 2020 - Mar 2024

- Provided Lithuanian-to-English and Spanish-to-English translation and English-language proofreading services.
