PROFESSIONAL SUMMARY

Data-focused technical professional with hands-on experience using Python, SQL, APIs, web scraping, automation, and analytical tools to collect, process, analyze, and communicate data. My background in technical SEO and analytics includes working with performance data across international markets, building Python and API-driven workflows, and translating trends and experiments into actionable decisions. I also build backend and AI-enabled tools using technologies such as FastAPI, Docker, gRPC, and LLM APIs, bringing a strong software-engineering mindset to data work.

TECH STACK

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Looker Studio, data cleaning, EDA, statistical analysis, confidence intervals

Scraping & Automation: BeautifulSoup, Selenium, SERP scraping, parsing, workflow automation

Programming: Python, SQL, HTML/CSS, FastAPI, REST APIs, Requests, JSON, gRPC

AI Engineering: LLM integration, prompt engineering, structured outputs, AI workflow development, AI-assisted automation

Tools: Git, GitHub, Docker, JupyterLab, VS Code, Render, CMS environments, structured data/schema markup

PROFESSIONAL EXPERIENCE

Mediatech — Jan 2024 - May 2026
Vilnius, Lithuania

SEO Specialist

- Analyzed performance across international markets using Power BI, Looker Studio, SEO platforms, and internal data to identify trends and opportunities.
- Prepared recurring and ad hoc reports using historical performance, keyword data, and experimental results to support business and SEO decisions.
- Developed Python tools and API integrations used by teammates to automate SERP data collection, research, analysis, and repetitive workflows.
- Built and maintained web-scraping and data-processing workflows, including Docker-based setup, maintenance, troubleshooting, and ongoing support.
- Designed AI-assisted workflows for research and analysis and supported teammates with practical AI adoption.
- Collaborated closely with development teams on CMS functionality, structured data/custom schema, technical improvements, and workflow-enhancing features.

UAB Skrivanek — Apr 2022 - Dec 2023
Vilnius, Lithuania

Assistant Project Manager

- Managed complex multilingual localization projects, including gaming content translation and other high-volume language workflows.
- Coordinated freelance linguists and handled QA, keyword localization, ISO documentation, audits/tenders, and junior team training.

Freelance — Sep 2020 - Mar 2024

Translator & Proofreader

- Provided Lithuanian-to-English and Spanish-to-English translation and English-language proofreading services.
